2-in-1 SPONGE

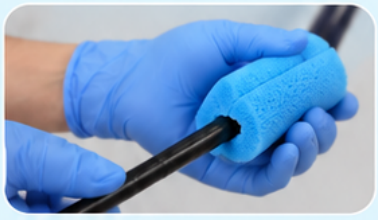

Cleans & Protects for a safer workflow

The Endomed 2-in-1 sponge is designed to clean the external surface of the endoscope and protect the distal tip throughout the reprocessing workflow.

Cleans
Effectively cleans the external surface of the endoscope.

Protects
Helps protect the distal tip during the reprocessing process.

1 Clean
Use the sponge to clean the external surface of the endoscope.

2 Protect
After cleaning, leave the sponge on the distal tip of the endoscope.

3 Maintain
Keep the sponge on the distal tip until the endoscope is placed in the AER.

Key **Benefits**

Helps protect the distal tip
Reduces the risk of damage during reprocessing.

Supports equipment longevity
The distal tip glass is one of the most common and costly repairs.

Streamlines workflow
Clean and protect in one easy step.

Convenient and disposable
Dispose of the sponge when the endoscope is placed in the AER.

Supports sustainable practice
Helps extend the life of your endoscopes, reducing maintenance and waste.
